Forecast for Friday 29 Sep 2023

Weather: Early valley fog patches and low cloud covering some hills at first, but this will quickly lift, with a mixture of sunny spells and cloud for the rest of the day. The odd isolated shower is possible but most places will remain dry.

Chance of cloud-free hill tops above 600m: 50%, becoming near 100% by mid-morning.

Low cloud and visibility: Areas of low cloud likely with base around 300-500m at first, but this will quickly lift clear of all hills by mid-morning. Valley fog patches also lifting and breaking during the morning. Very poor visibility in early low cloud covering hills and valley fog, otherwise very good throughout the day.

Forecast for Saturday 30 Sep 2023

Weather: A chilly start is possible, but largely fine during the morning, with some hazy sunshine through high cloud. Cloud will thicken and lower into the afternoon, with spells of heavy rain possible, clearing towards midnight.

Maximum wind: Southerly 10-15mph gusting 20-25mph, increasing to 20mph gusting 35mph.

Chance of cloud-free hill tops above 600m: 90% becoming 30%

Low cloud and visibility: Good visibility in most places during the morning, with high cloud well above the summits. This will gradually lower during the afternoon, becoming extensive above 400-500m during the evening. Visibility will be moderate or poor in any heavier rain, and very poor where cloud covers hills.

Temperature: **Valleys:** Plus 6 Celsius becoming plus 14 Celsius
At 600m: Plus 10 Celsius
Freezing level: Above the summits
